SUMMARY

Software Development Engineer and B.Tech graduate with hands-on experience building full-stack applications using Java, Spring Boot, React.js, MySQL, REST APIs, and JWT authentication. Skilled in developing scalable backend services, secure role-based authentication, relational database design, and frontend-backend integration. Strong foundation in DSA, OOP, DBMS, and software development principles.

EDUCATION

Roland Institute Of Technology, Berhampur

Bachelor Of Technology, Computer Science And Engineering

November 2022 - May 2026

CGPA - 8.32

Odisha Adarsha Vidyalaya, Badapur

Intermediate Science

July 2020 - August 2022

Percentage - 89.8

Odisha Adarsha Vidyalaya, Badapur

Matriculation

July 2020

Percentage - 82.4

SKILLS AND PROFICIENCIES

Programming Languages: Java, JavaScript, SQL

Frontend Technologies: React.js, HTML, CSS

Backend Technologies: Spring Boot, Hibernate, REST APIs, JWT

Databases: MySQL

Tools & Platforms: Git, GitHub, Postman

Computer Science Fundamentals: Data Structures & Algorithms (DSA), Operating Systems (OS), Computer Networks (CN), Database Management Systems (DBMS), Object-Oriented Programming (OOP)

WORK EXPERIENCE

KodNest Technologies

SDE Trainee

January 2026 – Present

OnSite

- Gained hands-on experience in Java, Spring Boot, MySQL, and frontend technologies through practical projects and training.
- Developed RESTful APIs, backend logic, database operations, and frontend-backend integrations.
- Applied OOP, authentication, database design, CRUD operations, and problem-solving in practical software development projects.

PROJECTS

ShopKart – Full-Stack E-Commerce Platform | Java, Spring Boot, React.js, MySQL, REST APIs, JWT, Razorpay

- Developed a full-stack e-commerce platform with product catalog, category/brand filtering, search suggestions, sorting, pagination, cart, wishlist, reviews, and user address management.
- Implemented secure authentication and authorization using Spring Security and JWT, with protected user sessions and role-based access for customer and admin workflows.
- Built complete shopping cart and order management features, including quantity updates, checkout, order history, order cancellation, and return requests.
- Integrated Razorpay payments with server-side total calculation, stock validation, shipping-charge logic, order creation, and payment signature verification.

Hirely – AI-Powered Recruitment Platform | Java, Spring Boot, React.js, MySQL, REST APIs, JWT, OpenAI

- Developed a full-stack recruitment platform enabling job discovery, advanced job search, applications, resume management, notifications, and application tracking for candidates.
- Built recruiter workflows for company management, job CRUD operations, applicant tracking, candidate evaluation, application-status updates, and resume viewing/downloading using REST APIs.
- Implemented JWT-based authentication, Spring Security, role-based authorization, protected REST APIs, password hashing, and input validation for secure candidate and recruiter access.
- Integrated OpenAI-powered resume/job analysis and AI interview evaluation, including resume analysis history and interview question/answer evaluation workflows.

CERTIFICATION

- React.js – Basics to Advance — Physics Wallah
- Java for Beginners — Infosys Springboard
- Introduction to Java Spring Framework 101 — Simplilearn
